Dimitris K. Iakovidis is Full Professor in the Department of Computer Science and Biomedical Informatics, of the University of Thessaly in Greece, and he is also Deputy Head, and Director of the Bioimaging Laboratory, of that department. He has a BSc in Physics (1997), a MSc in Cybernetics (2001), and a PhD degree in Informatics and Telecommunications (2004), all from the University of Athens in Greece. The research interests of Prof. Iakovidis include signal and image processing, artificial intelligence, and decision support systems, with applications in biomedicine and other domains. In this context, he has co-authored over 200 scientific papers in international journals, conferences, and books, and he has participated in several funded European and National research projects. Prof. Iakovidis has served in Editorial positions of high-impact scientific journals, such as IEEE Transactions on Fuzzy Systems, and currently he is Editorial Board Member of the Measurement Science and Technology journal. Also, since 2014 he collaborates with the European Commission and other public authorities as an independent expert and quality controller, as well as with industrial bodies as a scientific consultant.
